WASHINGTON NOTES.

WASHINGTON, D. C., July, 4 .-

INTERESTING SESSIONS

DR. H. H. YOST,

PRACTICAL AND SCIENTIFIC

First Door North of Postoffice.

Pirst Door North of Postoffice.

These do not understand that I am not thankful for the liberal patronage of the people of Wichita, for it has far surpassed my expectations. With a thousand "Thank yoos," for the intelligence you have already shown in coming toward and obtaining what will save you that which money camnot have Vision, —I still wast you to continue to come, atthough the weather is dreadful bot.

Like all the rest of mankind, I am willing to work for money. With me it is the tew paltry dollars that is in it. With you it is a matter of far greater importance—one that cannot be computed in dollars and cents. So come along and I will stand the hot weather as long as I can do good, and at the same time nake some money, which is every man's duty.

But you that live in town come sarrly—come in the cool of the day; come before the crowds begin to come from the country, as mistakes are liable to occur under such circumstances. Of course mistakes are carrected should there be any. But we don't want to make any, and selfom will if ample time is allowed. But allow me to impress on your minds the fact that the proper selection of spectacles to correct the vision, and assist nature in retaining the normal condition of the eye, is a matter that cannot be done in haste.

If you are rich I don't want all your wealth for a pair of my lenses. White I am no cheap optician, dealing in cheap goods, I will not ask of you more than you are willing to pay after seeing what I can do for you. If you are poor don't let powerty keep you away. The Lord knows that if anybody needs good sight it is the poor. So come and see me, and I promise you the same attention and same lenses that the rich have, and at a price that you are able to pay.

Yours respectfully.

Yours respectfully.

Yours respectfully.

operation. The commissioner of favorage for the exhibition. There were greatly excited during the progress of the exhibition. There were greatly excited during the progress of the exhibition. There were the span, about 150 feet long. The structure is what is called in railroad parlance, false work It was forty feet from the water to the track. The cause of the accident is not clearly established. The engineer was backing the train in on the bridge, and in checking the speed to cross safely, the whole train was brought nearly to a stop in the center of the structure, a stop in the center of the structure, when extra steam was put on. The frail bridge began to totter and soon sank beneath the ponderous weight. The engineer saw that nothing could be done to prevent the disaster and began sounding his whistle, which was committed for trial, charged with conspiracy against the dignity of the queen in aiding and abetting in the destruction of the public building here. Bail was refused.
